build night 3

sequence models I

continue to be proud.

that is all. 😌

agenda

- git flow***
- wtf are neural networks?
- go over homework, share findings/blockers
- skim the reading one more time
- codelab: let's go over the API for recurrent neural networks
- discuss dataset selection
- homework and meeting stuff
- if time: work on homework

acm
research.

project structure

1 welcome & problem definition

2 intro to machine learning

3 sequence models

4 sequence models ii federated learning

5 federated learning ii

6 data sourcing & preparation

7 data prep ii & model training

8 model pruning & federation

9 poster & presentation work

10 poster work ii & practice

acm research.

git flow. let's talk about it.

homework on github
